

Some Home Activities that Support Learning Grades 4-6

- Bake or Cook something – discussions about measurements and amounts of ingredients support mathematical thinking.
- Make a book which includes a title page and detailed illustrations (don't forget to have an orientation, complication, sequence of events and conclusion)
- Create a poster/project on a topic of your choice
- Create a map of your house from a bird's eye point of view. Label rooms and add colour.
- Do origami on your own or with an adult
- Telling the time using an analogue clock
- Practice adding coins and notes and working out change
- Plant a plant eg peas or beans in the garden and track its growth. Create a growth chart and illustrate it.
- Create an obstacle course in your backyard and see how fast you can complete it.
- Use recyclable materials from home to create a model or diorama on a topic of your choice.
